

# TrendPulse QTC March 5 Course

Wednesday's reflection: "We succeed not because we're great at solving problems, but because we're great at avoiding them. We simply focus on doing the easy things." — Warren Buffett

Good morning, everyone! I'm Amelia Carson, and I'm delighted to continue our engaging investment discussions this Wednesday with all of you, my friends, especially our newest members who have just joined this thriving community.

Welcome to the TrendPulse Quantitative Think Tank Center's Investment Education Community, where we are committed to promoting the Robovis Quantitative System. Our mission is to empower investors by providing cutting-edge, data-driven investment solutions. Together, we aim to achieve extraordinary investment breakthroughs and lasting success. Yes, investing is far from simple, but our goal with Robovis is to make it easier, and even effortless.

In today's fast-evolving tech landscape, artificial intelligence has taken the world by storm. From ChatGPT's groundbreaking debut to the widespread adoption of AI applications, technology is reshaping how we live, work, and invest.

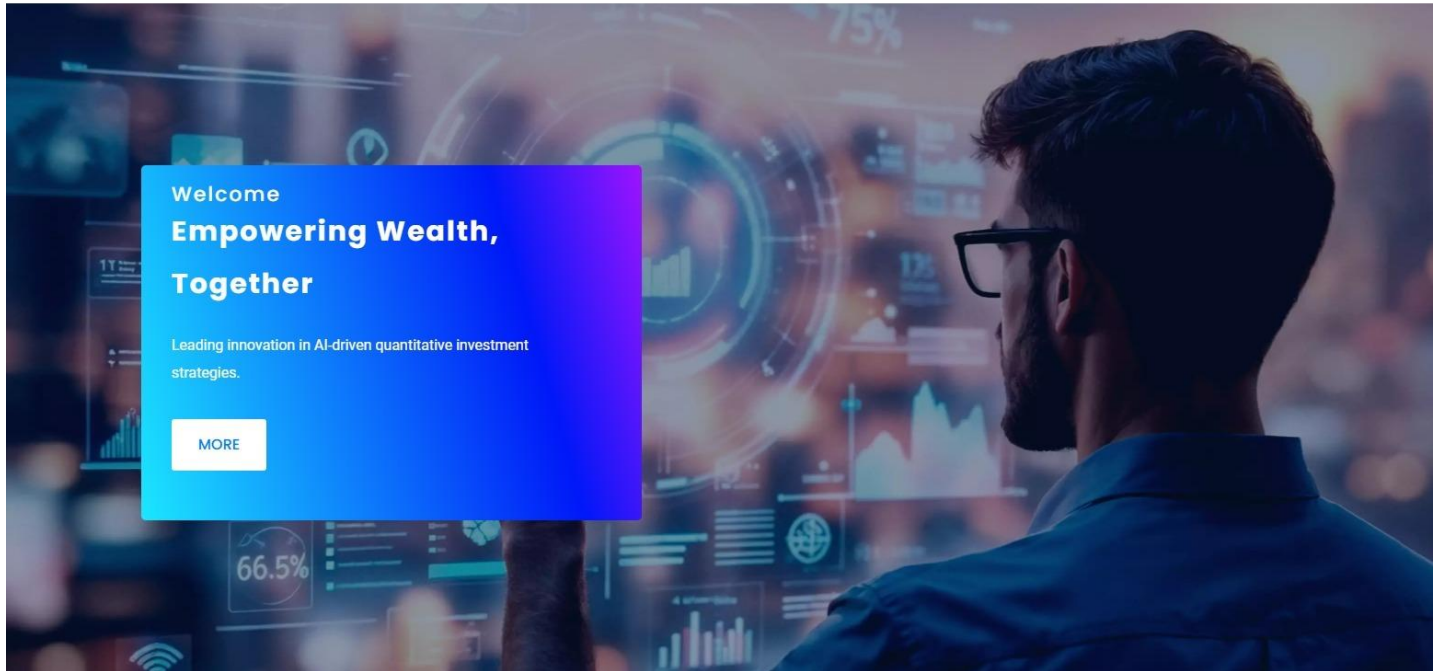

In the face of this growing trend, the top priority for many investors is how to effectively and precisely utilize quantitative systems to create greater investment value for themselves.

I am an assistant at TrendPulse Quantitative Think Tank Center and also a research associate to its founder, Dr. Johnathan Walker.

How can you quickly get to know our Quantitative Think Tank Center?

At our core, we specialize in the integration of blockchain and artificial intelligence. Since our founding, we have been committed to merging technological innovation with market demand,

providing global investors with precise, high-efficiency investment tools and strategic solutions.

Robovis seamlessly integrates blockchain technology with quantitative systems, utilizing a universal token as a bridge. This not only automates investment strategies but also fosters a sustainable, interactive community ecosystem that encourages long-term investor engagement. Beyond technology, we place equal emphasis on investment education. Through courses and hands-on training, we equip investors with quantitative investment principles and practical applications, empowering them to maximize the value of Robovis. This not only strengthens user trust but also solidifies Robovis' competitive edge in the market.

To build a dynamic and engaged user community, we have created an open, transparent, and highly efficient interactive platform. By incorporating a universal token system, users can participate in decision-making, share rewards, and contribute to system optimization. This participatory model enhances engagement and lays the foundation for long-term growth.

How can you get to know us instantly?

The best way to explore who we are is by visiting our official secure website:

[www.trendpulse-ai.com](http://www.trendpulse-ai.com)

Here, you'll gain quick and seamless access to the premium services and value we are ready to offer you.

Clearly, when we open a window of opportunity for you, you've already found your path home.

Why did we create this community?

Because we aim to build something more than just an investment network—we want to cultivate genuine friendships.

True loyalty isn't bought; it's earned.

It's about reaping the rewards of investment success and naturally fostering genuine appreciation and loyalty.

This word-of-mouth reputation is the foundation of our brand's growth, and it's what makes this community thrive.

We look forward to you feeling at home here and making the most of everything we offer. So, what valuable insights and services can you expect from us each day?

First, we will offer the following key services to our community members:

#### 1. Advanced Quantitative Insights & Personalized Research Reports

Our Robovis Quantitative System provides in-depth stock analysis and customized investment reports tailored to your needs.

During our promotional phase, these premium services are available to you at no cost—an opportunity you won't want to miss.

#### 2. Access to Elite Quantitative Investment Strategies

Our cutting-edge quant algorithms outperform 99% of market analyses and trading decisions, helping you secure highly effective investment outcomes.

This institutional-grade technology, previously accessible only to top-tier funds, is now within

your reach.

### 3. Exclusive Investment Education & Expert-Led Courses

Led by our founder, Dr. Johnathan Walker, and his elite research team, our investment education programs offer practical insights into quantitative finance.

Expect engaging, thought-provoking lessons designed to elevate your market expertise.

### 4. Beyond investment insights, we prioritize community warmth.

As your dedicated assistant, I take pride in ensuring you receive exceptional guidance, thoughtful service, and an investment experience that feels as refreshing as spring.

If you're new here, take a moment to reflect—do you see how we've carefully prepared everything to set you up for success?

Why are we offering this free service? Aren't we concerned about promotion costs?

Great question. No, we are not running a purely charitable initiative. As a quantitative think tank center, we are a business—one that seeks value, growth, and returns. Our goal is to attract more users, build strong word-of-mouth recognition, and expand our influence. Instead of simply giving, we approach this from a perspective of mutual value exchange, an investment that benefits both sides.

So, how do we deliver real investment value to you?

How do we elevate your trading perspective to a higher level?

The answer is simple: Every business has a budget for advertising. But instead of spending it on media placements, we have found a smarter approach—

building authentic relationships, delivering tangible results, creating a verified, community-driven service, establishing long-term investment value scenarios

That's why, rather than funneling our budget into media ads, we are investing directly into every new user who joins us. This isn't just a cost—it's a strategic move to create lasting

business value.

Do you see the vision now, my friend? We're building something bigger together!

As Dr. Johnathan Walker's assistant, I take great pride in sharing his investment insights and market analyses. Today is Wednesday—let's continue engaging in this valuable discussion. Within this, you'll find investment knowledge that is both beneficial and instructive for your strategy.

Below is an exclusive market analysis from Dr. Johnathan Walker's unique perspective:

From a professional quantitative perspective, identifying market stabilization and true reversals is critical, especially when trading near the bottom. This distinction helps prevent mistaking a temporary rebound for a full-fledged reversal, ultimately protecting both capital and portfolio positioning.

One of the biggest pitfalls for individual investors is going all in on what appears to be a reversal, only to realize too late that it was merely a short-lived bounce—resulting in devastating losses as the downtrend continues.

A genuine market reversal follows a structured pattern and must meet 6 key quantitative criteria.

These can be categorized into two sequential phases:

stabilization and reversal.

1: Institutional buy pressure across two major exchanges turns positive and remains strong throughout the day

My Robovis system tracks and updates this daily across the two major exchanges. A sustained, strong positive buy flow throughout the trading day is the most sensitive leading indicator of institutional money re-entering the market, this is the lifeblood of liquidity.

Concurrently, M10 (top 10 tech stocks) and Semiconductors must also show strong positive buy

pressure throughout the session, as they serve as momentum engines of capital inflow.

2: SPY, QQQ, M10, and semiconductors show a short-term buy pressure reversal to the upside (Stabilization).

3: The cumulative buying pressure on the exchange stops declining and starts to rise; mid-term momentum reverses (Reversal).

4: Capital continues to flow into M10 and semiconductor stocks for more than three days. If the inflow shifts to defensive stocks, it indicates that the market is still in a risk-off mode, making it difficult to gain significant momentum. (Reversal)

5: The long-short balance on the exchange returns to positive territory, indicating that the bulls have regained control.

6: The mid-term buying pressure of the three major indices and key momentum stocks reverses upward (trend reversal).

Before the market fully reverses, every rebound is shaky and short-lived—nothing more than a temporary swing. The only smart move? Tactical trading. It's all about protecting your positions and systematically driving down your cost basis.

But once the market does flip, the game changes. Rebounds gain real momentum, and stability kicks in, that's when you can ease up and let profits run

Investment knowledge: some quick TIPS

A simple breakdown of the 'Risk Off' Mode

Picture yourself as a ship captain, and suddenly, you notice signs of an incoming storm. What's your move?

Risk Off mode: You immediately lower the sails, drop anchor, swap cargo for ballast, and take shelter in a safe harbor.

Risk On mode: Instead, you raise even more sails, push full throttle, and charge ahead into the unknown.

In plain terms, Risk Off is just a fancy way of saying playing it safe.

When uncertainty or negative market signals emerge, investors tend to get cautious. They ditch high-risk assets in favor of safer ones—just like how, if the forecast calls for heavy rain, you'd rather park your sports car in the garage and opt for an indoor activity instead.

Looking at today's Wednesday market performance, it aligns only with the second key characteristic I've been watching.

As the chart shows, the .SPX is currently forming a stabilization zone but has yet to establish strong support.

This tells us one thing: our investment and trading approach should lean toward risk management and strategic stability.

This has been my core market theme since Monday, and nothing has changed.

I just condensed Trump's 1h congressional address into 1 minute essentials.

America First—his second term agenda prioritizes economic recovery, lowering energy costs, cutting waste, and tackling inflation.

Key sectors poised for growth: oil, rare earths, semiconductors, shipbuilding, and auto manufacturing.

Trump announced efforts to restart numerous power plants previously shut down due to policy

constraints.

Why does this matter?

More energy supply leads to lower costs

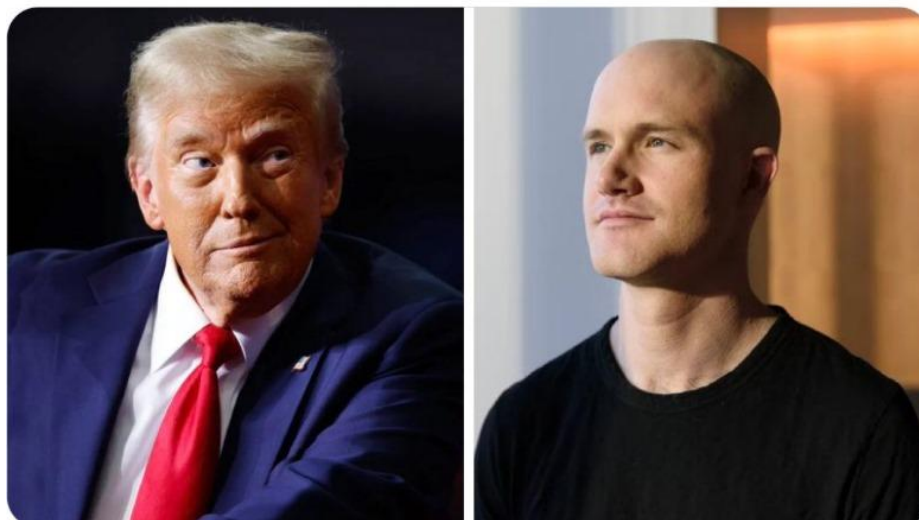

Increased domestic capacity reduces shortages

Stable power infrastructure strengthens the economy

Wouldn't this be bullish for energy stocks?

\$VST should be a strong hold in your portfolio. The market loves momentum, and this is where it's building

**JUST IN: 🇺🇸 President-elect Donald Trump to meet with Coinbase CEO Brian Armstrong.**

Trump has announced that the U.S. will establish a strategic reserve for crypto, with Bitcoin and Ethereum at its core. The White House is set to host its first-ever crypto summit on March 7, where Trump himself will take the stage.

Just the phrase "White House's First Crypto Summit" is enough to send shockwaves through the crypto industry. This Friday's event marks the beginning of a series of policy-shaping meetings, where the Presidential Digital Assets Task Force will collaborate with industry leaders to craft regulations.

Here's where it gets even bigger: while Bitcoin will be a key asset in the government's reserve, other assets will likely have to be acquired on the open market—a massive tailwind for crypto

prices.

Trump's administration is also rolling out a zero capital gains tax policy, meaning crypto holdings of over one year will be completely tax-free.

Now, ask yourself this—if you hold COIN, what kind of reversal is about to unfold? Can you name a better entry point than right now?

The above is Dr. Johnathan Walker's full market analysis for today. If you've just joined us—welcome! You're in the right place. You might be interested in participating in our exclusive Guaranteed Stock Trade Verification program for community members.

This isn't just another trading event. It's a risk-management safeguard designed to protect your trades while giving you real-time engagement with market strategies. It's a hands-on, inclusive way to learn, execute, and interact with our decision-making framework.

Here's how it works:

You participate by trading selected stocks according to our structured strategy and execution details.

If, at the end of the specified period, your position still results in a loss—despite following all our trade parameters—we cover it.

Yes, you read that right, if you meet the execution requirements and the trade doesn't work out, we compensate you.

This is an innovation-driven commitment and a testament to our responsibility to our community.

Every member is welcome to join. Try it, experience it firsthand, and let me know your thoughts. Your feedback is invaluable.

If you're already participating in the Guaranteed Stock Trade Verification, be sure to follow the

detailed trading guidelines and hold your position until the verification process concludes.

Of course, the number of trades is limited, and for good reason. Since we are offering verification-backed protection, we have implemented a systematic risk management strategy to ensure the integrity and sustainability of the program.

That said, if you believe in the strength of this opportunity and the security we provide, you are always free to increase your position size and allocate more capital to participate in these stocks.

At the core of this initiative is a commitment to delivering exceptional value through professional insights and deep market expertise. Our goal is to offer more than just a trading opportunity—we're fostering a community where you feel supported, valued, and ahead of the game.

Do you enjoy this feeling of being loved and supported?

Dear Friends,

If today is your first time joining us, or if you've just arrived, you still have the opportunity to participate in today's Guaranteed Stock Trade Verification Program #4

&&&Today's selected stock: PLTR

&&Current price: \$88

&&Trade date: March 5

Required position size: 15 shares

&&&Trade validation deadline: March 14

Stock verview:

PLTR is a software and data-driven stock currently trading at a technically adjusted low, with confirmed stabilization. Coupled with positive developments in the chip and data sector, Dr. Johnathan Walker sees this as an exceptional trade opportunity.

Please send me a screenshot of your trade confirmation for registration and verification under the guarantee

PS-Should this trade result in a loss, our Quantitative Trading Center will provide direct compensation.

However, only trades executed according to these requirements will qualify for the Guaranteed Trade Validation Program.

Besides market analysis and trading insights, besides dissecting your investment holdings, we also want to move from logic to emotion, because investing is not just about numbers, it's about human experience.

That's why I invite you to explore something exciting on our official website: [www.trendpulse-ai.com](http://www.trendpulse-ai.com) – our exclusive giveaway page.

If you enjoyed this journey with us, you'll love the reward opportunities that await you. If luck is on your side, just enter your giveaway code, activate it and see what fortune has in store for you.

Oh! Don't have a giveaway code yet? Don't worry! Complete a quick interactive quiz and I'll send you one:

1. Why does Dr. Johnathan Walker place so much importance on cryptocurrency-related stocks

COIN?

2. If you have a giveaway code, what kind of welcome gift would you like to receive?

3. What is today's guaranteed stock trade verification code? Will you follow the trade?

Submit your answer and based on your participation in the community, I'll instantly send you your well-deserved reward.

March in the United States is full of warmth and sunshine, just like meeting you this time. I hope we can bring each other good luck on this journey. Looking forward to meeting again on Thursday!
